

Recycling of non-precious metals

Reusable Material
Management in
Perfection

Unused capital from your stocks

SilverTeam recycles non-precious reusable materials

Non-precious metals

Copper / alloys [Cu]

- with / without galvanic coatings [Sn, Ni]
- with / without Ag contacts

Brass / alloys [CuZn]

- with / without galvanic coatings [Sn, Ni]
- with / without Ag contacts

Bronze / alloys [CuSn]

- with / without galvanic coatings [Sn, Ni]
- with / without Ag contacts

Special reusable materials

Copper-beryllium [CuBe]

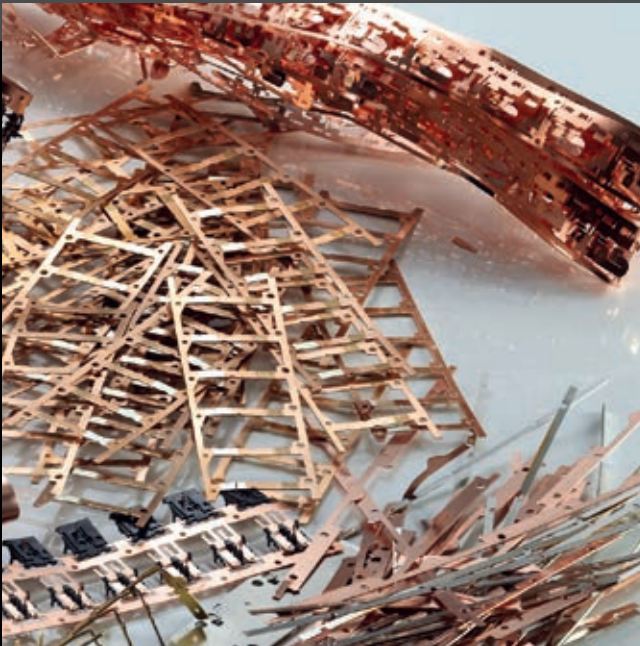

- with / without galvanic coatings [Sn, Ni]
- with / without Ag contacts

Nickel-beryllium [NiBe]

- with / without galvanic coatings [Sn, Ni]
- with / without Ag contacts

Reusable materials from non-precious metals

Copper, brass, bronze, tin-coated, nickel-coated

Chads
Warehouse clear-outs
Over-production
Production waste

Fast processing and crediting of recycling items

... collected free of charge, samples taken, analysed in the laboratory, assessed according to quantity delivered and to latest commodity prices. After successful checks upon arrival and separation into pure substances, we issue a credit note and transfer your money within a few days.

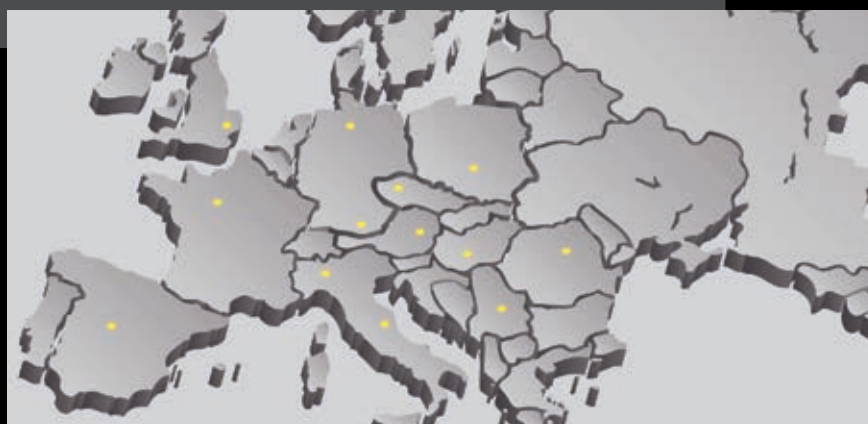

Service is our trademark

These characteristics make SilverTeam unique

Wide range of materials

Reusable materials with or without galvanic coating are recycled by SilverTeam.

Direct customer care across Europe by our field sales force and our office team. Competent contacts on site or at our plant.

On-site support across the group in Germany and abroad

Your sites will be dealt with and managed logistically as one entity. This results in cost savings and transparency.

Direct transport chain

SilverTeam delivers and disposes of materials directly, and often without the usual local intermediate stations. This saves both time and money.

EU dispatch documentation

We produce legally valid shipment documentation for the transportation of your reusable materials in accordance with the guidelines of the EU Waste Regulation.

Prepared material sorting

Replaceable forms on the front of the Big Bags make it easy for you to quickly view what the contents are.

Effective logistics

Collection containers

We'll provide collection containers free of charge while the reusable materials are being gathered.

- Sturdy plastic design, QM certified
- low weight
- selection of pallet formats:
 - industrial pallets CTH2 (800 x 1000 mm)
 - Europe pallet CTR 3 (1000 x 1200 mm)
- can be piled on top of each other
- small footprint
- professional image in the storage area
- also available with lockable lids
- weatherproof, and suitable even for outdoors
- can be placed inside each other when empty to save space during transportation

Big Bags

These are an ideal addition as container inlays.

We also provide these free of charge.

The benefits are:

- one-way transportation; the containers remain on site, and the large format bags are removed
- simple groupage freight labelling with prepared, replaceable insert sheet on the edge
- economic and environmentally-friendly handling
- cost-effective
